Not illustrated. 1909 Excerpt: . by the 1st of May the larger streams were breaking up. If the run-off of 3 to 5 second-feet per square mile incident to the break-up during the month of May and part of June could have been distributed through July and August an adequate supply would have been at hand for any reasonable development. Could storage be provided for this period of excessive run-off, a number of projects which have been considered in the Fairbanks district would have a brighter aspect; in fact, they could rightly be considered as commercial possibilities. The development of water power for electric transmission in the Fairbanks district seems worthy of consideration. Records relating to such development have been kept in the Little Chena drainage basin for two seasons, and in the spring of 1908 similar records were started on Washington Creek. CIRCLE DISTRICT. GENERAL CONDITIONS. The situation in part of the Circle district is more favorable for hydraulicking than that in the Fairbanks or Rampart regions. The camps on Mammoth and Eagle creeks lie on streams of relatively high gradients and consequently the water supply, though small, can be delivered to the mining property by comparatively short ditch lines, which give high heads for operating. Up to 1906 practically the only hydraulic development in this district was a small plant on North Fork of Harrison Creek, but owing to miscalculations the project proved a failure. However, considerable construction work was done during 1908. Eagce Creek. The ditch that...
