*This ebook is definitely not straightforward to start on looking at but really enjoyable to learn. It usually will not charge excessive. It is extremely difficult to leave it before concluding, once you begin to read the book.*

John Wiley and Sons Ltd. Paperback. Book Condition: new. BRAND NEW, Possible Selves and Adult Learning, Marsha Rossiter, This issue introduces practitioners, scholars and students to the construct of possible selves and its potential applications in the field of adult education. The possible selves construct offers a useful and largely unexplored framework for understanding adult learning as the medium through which change, growth and goal achievement occur. The chapters in this volume outline in practical terms the research-based applications of possible selves that have relevance fo adult educators. Introduced by Hazel Markus and Paula Nurius in 1986, possible selves refer to the future-oriented components of an individual's self-concept; they are imagined future selves, including the selves that are ideal and hoped for. In the past twenty years, a substantial body of research has explored the connections between possible selves and life span development, race and gender, career development, and academic achievement. As a result, a variety of possible selves approaches has been applied in fields of practice corresponding to adult education, although the construct remains relative unknown in adult education itself. This is the 114th issue of the Jossey-Bass quarterly report series New Directions for Adult and Continuing Education.
